WINES

14|27 Rosé | 100% Xinomavro | 12.5% ALC

Our Rosé is made from a clone of Xinomavro which has very low pigment density, making it perfect for dry rose wine.

The extended soak time allows for full characteristic development.

On the nose the wine expresses a delicate blend of wild strawberry aromatics with rose petal and fresh heirloom tomato; kind of like the perfect summer salad.

“Light peach color; turns out that the great red grape of Greece makes a bright, crisp rosé that’s tangy, racy and fresh; there’s lively apple-tinged fruit and racy acidity, balanced and juicy.”

- Blue Lifestyle 2019

Appellation: Macedonia

Aging: 6 months in stainless steel

Fermentation: 8-10 hour cold maceration of 70% of the fruit at 10°C. 30% free-run juice. Fermentation at 16°C for 14 days.
